My First Experience with the Dangers of Documentation

In my world, we don't have to worry about mutant, script-injecting warlocks. No. We have something far worse. We're plagued by Wolpertingers. And Wolpertingers are most common in prod.

Origins

You may not be familiar with these [ravenous beasts](#), but, trust me, they'll eat your shorts and suck the loops from your code.

Test #1

This is a test of the GITHUB desktop application - CB
